

Alatac 100-10

Manufacturer: Mobile Rosin Oil Company
Classification: Rosin Tackifier
Chemical Composition: Rosin/tall oil fatty acid solution

Specification Properties	Value
Acid Number	75-95
Brookfield Viscosity, CPS	2750-3950
Moisture, %	0.25 maximum
Saponification Number	90-125
Specific Gravity @ 15.5°C	1.00-1.03
Typical Properties	Value
Physical Form	Dark, viscous liquid

> APPLICATIONS

Uses: Low cost tackifier for tires and other rubber products. Provides excellent initial tack. It is usually used in combination with phenolic resins to improve aged tack.

> PACKAGING AND STORAGE
